Author index

Volume 67 (2002)

Ananiadou, S. **67**, 33
Asker, L. **67**, 49

Baud, R. **67**, 1, 75
Bodenreider, O. **67**, 85
Buitelaar, P. **67**, 97
Burgun, A. **67**, 85

Cöster, J. **67**, 49

de Bruijn, B. **67**, 7

Eriksson, G. **67**, 49

Franzén, K. **67**, 49

Grabar, N. **67**, 113

Hahn, U. **67**, 63
Hatzivassiloglou, V. **67**, 19

Lidén, P. **67**, 49

Martin, J. **67**, 7
Mima, H. **67**, 33

Nenadić, G. **67**, 33

Olsson, F. **67**, 49

Raileanu, D. **67**, 97
Rindflesch, T.C. **67**, 85

Ripplinger, B. **67**, 97
Romacker, M. **67**, 63
Ruch, P. **67**, 1, 75

Sacaleanu, B. **67**, 97
Schulz, S. **67**, 63
Spasić, I. **67**, 33

Tsujii, J.-i. **67**, 33

Vintar, Š. **67**, 97
Volk, M. **67**, 97

Weng, W. **67**, 19

Zweigenbaum, P. **67**, 113

Subject index

Volume 67 (2002)

Algorithms; Natural language processing; Machine learning; Controlled vocabulary; Language; France **67**, 113

Computational molecular biology; Knowledge; Linguistics; Natural language processing; Medical information science; Information extraction; Protein names **67**, 49

Computer analysis of biological text; Protein–protein interactions; Protein–gene interactions; Interaction verbs; Text mining; Machine learning **67**, 19

Controlled vocabulary; Natural language processing; Machine learning; Language; France; Algorithms **67**, 113

Corruption; Information retrieval; Medical records; Spelling correction; Natural language processing **67**, 75

Evaluation; Information extraction; Text understanding **67**, 63

France; Natural language processing; Machine learning; Controlled vocabulary; Language; Algorithms **67**, 113

Indexing and abstracting; Natural language processing; Medline; Molecular biology; Knowledge acquisition (computer); Semantics **67**, 7

Information extraction; Knowledge; Linguistics; Natural language processing; Medical information science; Computational molecular biology; Protein names **67**, 49

Information extraction; Terminology management; Literature mining; Knowledge acquisition; XML annotation **67**, 33

Information extraction; Text understanding; Evaluation **67**, 63

Information retrieval; Corruption; Medical records; Spelling correction; Natural language processing **67**, 75

Information systems; Natural language processing; Linguistics; Semantics; Unified Medical Language System **67**, 97

Interaction verbs; Protein–protein interactions; Protein–gene interactions; Computer analysis of biological text; Text mining; Machine learning **67**, 19

Knowledge acquisition (computer); Natural language processing; Medline; Molecular biology; Semantics; Indexing and abstracting **67**, 7

Knowledge acquisition; Terminology management; Literature mining; Information extraction; XML annotation **67**, 33

Knowledge; Linguistics; Natural language processing; Medical information science; Computational molecular biology; Information extraction; Protein names **67**, 49

Language; Natural language processing; Machine learning; Controlled vocabulary; France; Algorithms **67**, 113

Lexical knowledge; Unified Medical Language System; SNOMED; Terminology **67**, 85

Linguistics; Knowledge; Natural language processing; Medical information science; Computational molecular biology; Information extraction; Protein names **67**, 49

Linguistics; Natural language processing; Semantics; Information systems; Unified Medical Language System **67**, 97
